***TAILORED*** *FOR YOUR* ***VISION***

INNOVATIVE **VISION**

# TAILORED FOR YOUR VISION\*

**TAILORED FOR YOUR VISION**, a new message that shows that we have always focused **exclusively on eye protection** and that **innovation** is at the heart of our developments to meet our users' needs as fully as possible.

Because we are eye protection specialists, we propose a **complete range of spectacles, goggles and welding helmets** adapted to every situation, a **range of quality prescription lenses** and a **Civil protection and Defence** range for the military, customs, police... and shooting sports.

We always go the extra mile to propose new eye protection for specific uses or environments. Check them out in **your new catalogue**. **It is more practical**, has clearer product segmentation and makes it possible to easily identify our flagship products and new technology: **new products** for all budgets, the extension of our solar and polarising solutions (because the sun, light and UVs are also an everyday risk) and **new products to complete the EXCELLENCE prescription range, which is the market leader**.

Tailored for your vision, is also the bespoke creation of **two new goggle versions for industry and healthcare**, models you can customise **to your colours and brands** and a **new on demand offer to develop special products**.

**Also, coming soon, an entire special Office range with polycarbonate afocal lenses for effective protection from blue light.**

We are by your side everyday to help you make the right choices and provide solutions to your issues. Don't hesitate to call on our services for **on site training**.

**Excellent protection, an attractive design, a reactive and involved team**, is more than ever the Bollé Safety signature.

# OVER 130 YEARS OF INNOVATION

## OVER THE YEARS BOLLÉ HAS BECOME A GLOBAL BRAND

Although initially benefiting from the Bollé brand image, year after year, Bollé Safety has developed its own distribution network and won its independence. Today, Bollé Safety is distributed in over 90 countries and over 15 million workers wear protective spectacles bearing the Bollé Safety signature. A remarkable sports-protection synergy!

## TODAY

**bollé**  
SAFETY

IS SOLD IN OVER **90 COUNTRIES**  
**15 MILLION**  
WORKERS WEAR BOLLE SAFETY PROTECTION

## OUR MISSION

### PROTECT WORKERS' VISION,

all over the world, in the most extreme environments and improve their performance. Personalise eye protection, develop tailor-made solutions, adapt our expertise to the specific constraints of each region, anticipate new needs and requirements of the expanding markets...

Every day we go further to satisfy the needs of our clients.

#INNOVATIVEVISION

### BOLLÉ SAFETY IS NOW PART OF:

B O L L É B R A N D S ™

## OUR OBJECTIVES

### PUT EYE PROTECTION AT THE CORE OF OUR EXPERTISE

and develop innovative solutions tailored to every market.

### DESIGN, MANUFACTURE AND MARKET

products that people want to wear and meet user expectations, to be "user centric".

### GUARANTEE OUR CUSTOMERS

a high level of safety, comfort, exceptional quality and innovation.

### SIMPLIFY OUR

customers' work by providing the highest quality of service at all levels.

# INTERNATIONAL PRESENCE, OUR CUSTOMER TESTIMONIALS

Through its major international position, Bollé Safety detects all potential risks in the work environment to provide innovative solutions, advanced and targeted lens coatings that comply with the strictest international standards (CE, ANSI, AS/NZS, CSA, EAC and JIS). Bollé Safety has over **150,000 partner companies** in the world in all sectors of activity in which there is a risk to the eyes:

-  **Aviation**
-  **Automotive**
-  **Industry**
-  **Oil & gas**
-  **Construction**
-  **Food processing**
-  **Pharmaceutical Bio-technology**
-  **Energy**
-  **Civil protection and defence**

**JEAN-LOUIS CASTELLANO**

Safety Manager  
at AIRBUS HELICOPTERS

*Airbus helicopters is the leading manufacturer of civilian helicopters in the world and one of the main manufacturers of military helicopters. It employs around 20,000 people globally.*

**Since when have you been working with Bollé Safety?**

I have been in charge of safety at Airbus Helicopters at Marignane and Paris-le-Bourget since 2013. Bollé Safety products were already used by staff when I arrived. We have been working with the brand for over 10 years.

**Why did you decide to continue working with them?**

They have quality products and the feedback from the field has always been positive. Just last year, new products became popular, in particular the COBRA. For prescription glasses, I appreciate the simplicity and efficiency of the web shop. I have good visibility of my orders and of all the people who are kitted out. So even for prescription glasses, the circuit is very simple and I save time because I no longer need to contact the opticians to get the information I need. I have a clear and reliable real time view. Finally, I greatly appreciate the sales contact: available, reactive and highly professional because they are attentive to solving every issue.

**What criteria did you use to select Bollé Safety?**

- If PPE is ugly people don't wear it. So appearance is important.
- Lightness, as protection must be worn for 8h.
- How well the product stays on the head, as some jobs require leaning or crouching positions.
- Strength, because users are not always very careful.

**What differentiates Bollé Safety from the other players on the market?**

The "BOLLÉ" name has an impact on users. It's a trusted brand, a reference that infers professional quality.

\* Airbus Helicopters employees.

**WHY DO THEY PREFER BOLLÉ SAFETY?**

**ANDY BROWN**

Safety and well-being manager at BACHY SOLETANCHE LTD on the VINCI Construction group major: THAMES TIDEWAY PROJECT

*The Thames Tideway programme is a project to transfer and store waste water and rainwater in central London, i.e. 32 kilometres of tunnels to increase existing network capacity. Begun in 2016, it is scheduled for completion in 2022. 500 to 750 people work on this project.*

**You have been loyal to Bollé Safety since 2016 to protect your teams, what were your selection criteria for the Thames Tideway project?**

I started with a field test using different brands of protective spectacles: RUSH+ from Bollé Safety but also Uvex and Riley. Steve L., my contact at Bollé Safety, came on site to give training. Just handing over a pair of spectacles isn't enough, if you want workers to wear them, you need to explain the product's characteristics and how it works, you need to show them how the product adapts to varying morphology (head size, shape of the nose, etc.). He also demonstrated the effectiveness of the PLATINUM® anti-fog coating.

**Which characteristics set Bollé Safety apart from the other players on the market?**

Glass quality is very important and the feedback from users in the field was unanimous on the RUSH+ model for its comfort, its wrap-around feature, the flexibility of the temples and the bridge. RUSH+ meets all these criteria. When you wear eye protection 8 to 9 hours every day, comfort is essential. The model is very adaptable to different facial morphology. We also use the retainer strap on that model, as well as the cases and cleaning wipes. Accessories are important too!

**PATRICK DEKENS**

PPE Safety advisor - for 38 years at AUDI Belgium. 3000 employees of which 500 wear protective spectacles.

**You have been a loyal Bollé Safety PPE partner for your employee protection for over 10 years, what are your main reasons?**

First of all, I'm very happy with our relationship with Nicolas V. whose role is to support and advise us. He's friendly and reactive, thanks to him there are never any problems, just solutions! As for the products, the range is very broad and there is a wide variety of lens colours. Audi has selected 4 models that are suitable for everyone and I'm still impressed by PLATINUM®. It is a really very effective anti-fog coating. I also appreciate the comfort of the different models.

**How would you describe the relationship with Bollé Safety ?**

Bollé Safety is a great partner for audits, user tests, for better adoption by employees. I trust the products and the brand.

**In your opinion, how does Bollé Safety stand out from the competition?**

Bollé Safety's main strengths? Service and product quality and comfort. In 12 years I have never had the slightest problem! Bollé Safety is an excellent supplier. With 500 people wearing eye protection, I also appreciate Bollé Safety's reactivity in answering questions and finding solutions. Bollé Safety is a known brand that innovates all the time, for example by offering the possibility of customising equipment using our brand and colours! Finally, Bollé Safety is more competitive than Uvex. All that makes the difference.

“ IT'S EASY TO CREATE PRESCRIPTION VOUCHERS ON THE WEBSHOP AND THE PRESCRIPTION PRODUCTS ARE GOOD VALUE FOR MONEY ”

“ BOLLÉ SAFETY IS RECOGNISED AS THE LEADER IN PROTECTIVE SPECTACLES ”

“ THE ANTI-FOG IS THE MOST EFFECTIVE TESTED AMONG SEVERAL OTHER BRANDS ”

The 3 characteristics users most appreciate are: **COMFORT - DESIGN - TECHNICALITY**

# SUPPORTING YOU TO RAISE AWARENESS

## AS TECHNICAL EXPERTISE ALONE IS NOT ENOUGH, WE SUPPORT YOU IN PREVENTING RISKS!

Our mission does not stop at designing and producing effective and comfortable eye protection in all situations. Even if the overall number of accidents is dropping, there are still too many. A lot of them could be avoided if all employees protected themselves. Informing and educating to change behaviour is also our concern. To achieve it, we help you in the field.

## KEY FIGURES THAT CALL FOR ACTION...

In EUROPE:

■ There were over **3.2 MILLION** workplace accidents in 2015 involving at least 4 days of sick leave.<sup>1</sup>

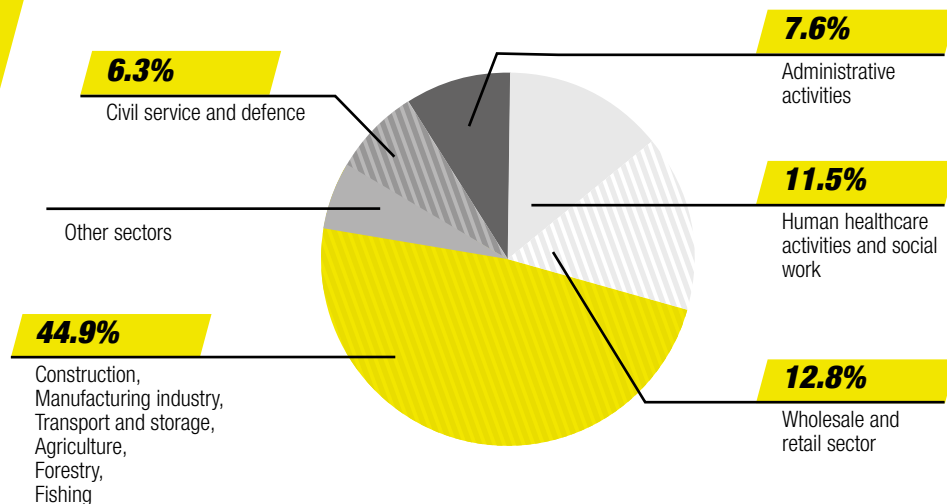

■ Significantly increased costs in 2019<sup>2</sup>

**+3.7%**  
in 2019

**+18%**  
since 2012

(mean cost of workplace accidents and occupational diseases)

■ The most impacted sectors<sup>1</sup> (non-fatal workplace accidents - 2015)

## THE MOST COMMON CAUSES OF EYE INJURIES<sup>3</sup>

**Flying particles**  
(pieces of metal, glass, wood, concrete)

**Tools**

**Dust**

**Chemicals**  
(spray and fumes)

**Radiation**  
(in particular visible light, ultraviolets, heat or infrared radiation and lasers)

**Pathogens**  
(transmitted by blood (hepatitis or HIV) from body fluids, including blood.)<sup>4</sup>

## THE MOST COMMON REASONS WHY WORKERS FAIL TO WEAR EYE PROTECTION<sup>5</sup>

**The lack of comfort and adjustability**

**Fogging**

**Scratches on the lenses**

**10 to 20%**

of accidents involving the eyes **will cause temporary or permanent sight loss.**<sup>4</sup>

**90%**

of accidental eye injuries **could be avoided or reduced by wearing suitable eye protection.**<sup>4</sup>

<sup>1</sup> [https://ec.europa.eu/eurostat/statistics-explained/index.php?title=Accidents\\_at\\_work\\_statistics#Standardised\\_incidence\\_rates](https://ec.europa.eu/eurostat/statistics-explained/index.php?title=Accidents_at_work_statistics#Standardised_incidence_rates)

MAKE THE RIGHT CHOICE

# MARKINGS AND STANDARDS

**Bollé Safety lens and frame marking is specific to each product.**

Each marking corresponds to a very specific use. Certified and tested by independent laboratories, this information guarantees protective eyewear quality and resistance.

EN Standard

EN166 FT CE

Lens technology  
Bollé Safety CSP

Manufacturer logo

5-1,4 1 FT KN CE

European standard

**Code (field of use)**  
2: UV filter (EN170)  
4: IR filter (EN171)  
5 or 6: solar filter (EN172)

**Protection class**  
1.2 to 6: visible light filtration

**Crown**  
Manufacturer identification  
Bollé Safety

**Optical class**  
1: high optical quality  
No optical distortion (suitable for permanent wear)

**Mechanical strength**  
S: S. Extra strong, resists a 22 mm 43 g ball falling 1.30 m at 5.1 m/s.  
F: Low energy impact, resists a 6 mm, 0.86 g ball at 45 m/s.  
B: Medium energy impact, resists a 6 mm, 0.86 g ball at 120 m/s.  
A: High energy impact, resists a 6 mm, 0.86 g ball at 190 m/s.  
K: Resistance to surface damage by fine particles (optional).  
N: Resistance to fogging (optional).

T: The letter T, immediately after the mechanical strength symbol, authorises use in an environment in which high speed particles at extreme temperatures are present.

**The crown:**  
the guarantee of Bollé Safety product authenticity and high quality

# EUROPEAN STANDARDS

## BASIC STANDARDS

**EN166** Guarantee of minimum protection against everyday risks (dropping, sun-ageing, heat exposure, corrosion, etc.).

**EN167** Optical test methods.

**EN168** Test methods other than optical.

## STANDARDS BY TYPE OF APPLICATION

The type of use of the product and the corresponding standard are identified by a code (field of use) which is on the lens marking.

**EN169** Welding filters.

**EN170** Ultra-violet filters (code 2 or 3).

**EN171** Infra-red filters (code 4).

**EN172** Industrial use solar protection filters (code 5 or 6).

**EN175** Equipment for welding (presence of the EN175 marking on the product).

**EN207** Laser protection spectacles (code LB1 to LB10).

**EN208** Laser adjustment spectacles (code R1 to R5).

**EN379** Specification covering welding filters (EN379 marking on the filter).

**Bollé Safety product approval certificates to CE standards will be sent on request.**

## FRAME MARKING

Frame marking must include the CE symbol and manufacturer identification (logo or brand). If the spectacles refer to the EN standard, the EN standard number is mandatory together with the various use and mechanical strength symbols, in accordance with the tests requested by the manufacturer.

### Use symbols:

**Only on the frame (chemical protection).**

**3.** Liquid droplets (goggles) or splashes (safety face shields).

**4.** Large dust particles > 5 microns.

**5.** Gas and fine dust particles < 5 microns.

**Marking on the frame and the lenses mandatory.**

**8.** Electrical short circuit arc.

**9.** Molten metal and hot solids.

### Mechanical strength symbols:

**Marking on the frame and the lenses mandatory.**

**S.** Increased strength, resists a 22 mm and 43 g ball falling from a height of 1.30 m at 5.1 m/s.

**F.** Low energy impact, resists a 6 mm, 0.86 g ball at 45 m/s.

**B.** Medium energy impact, resists a 6 mm, 0.86 g ball at 120 m/s.

**A.** High energy impact, resists a 6 mm, 0.86 g ball at 190 m/s.

**T.** The letter T, immediately after the mechanical strength symbol, authorises use in an environment in which high speed particles at extreme temperatures are present.

## MARKING OF LENSES

**Lens marking must include:**

- The scale number for filtering lenses (code).
- The manufacturer's name (logo or brand recommended by the manufacturer).

### Optical class symbols:

1. Continuous work - Worn permanently.
2. Non-continuous work - Worn intermittently.
3. Occasional work, must not be worn permanently.

### Field of use symbols:

8. Electrical short circuit arc.
9. Molten metal and hot solids.

### Mechanical strength symbols:

**Marking on the frame and the lenses mandatory.**

**S.** Extra strong, resists a 22 mm 43 g ball falling 1.30 m at 5.1 m/s.

**F.** Low energy impact, resists a 6 mm, 0.86 g ball at 45 m/s.

**B.** Medium energy impact, resists a 6 mm, 0.86 g ball at 120 m/s.

**A.** High energy impact, resists a 6 mm, 0.86 g ball at 190 m/s.

**T.** The letter T, immediately after the mechanical strength symbol, authorises use in an environment in which high speed particles at extreme temperatures are present.

### Marking on the lenses only.

**K.** Resistance to surface damage by fine particles (optional).

**N.** Resistance to fogging (optional).

## WARNING

**F.** Maximum protection for spectacles.

**B.** Maximum protection for goggles.

**A.** Maximum protection for face shields.

If the S, F, B, A and T symbols do not apply to both the lens and frame, then the lowest level must be assigned to the complete protective eyewear.

MAKE THE RIGHT CHOICE

# WHAT TYPE OF PROTECTION TO CHOOSE?

**For each risk, high performance protection adapted to your industry.**

Assessment of occupational risks involves identifying, assessing and ranking risks in the workplace to implement relevant preventive measures.

It is the initial step in occupational health and safety. It is vital to check that the risk identified, the directives of the standard and the markings on the product all match.

## PROTECTING FROM MECHANICAL RISKS

Grinding work, particle projections, projections of metal filings or debris from tools.

Risks or use	Symbol*	Spectacles	Goggles / Helmets	Safety face shields	Standard
Low energy impact 45 m/s	F				EN166
Medium energy impact 120 m/s	B				EN166
High energy impact 190 m/s	A				EN166

The F, B or A symbol must imperatively be indicated on the lens and the frame to guarantee protection from mechanical risks. If the symbols differ, the symbol representing the lowest resistance applies to the whole protection equipment.

## PROTECTING FROM THERMAL RISKS

Protection from hot liquids or solids, intense heat radiation, radiant heat from furnaces.

Risks or use	Symbol*	Spectacles	Goggles / Helmets	Safety face shields	Standard
Splatters of molten metals and hot solids	9				EN166

The 9 symbol must imperatively be indicated on the lens and the frame to guarantee protection from thermal risks.

## PROTECTING FROM CHEMICAL RISKS

Spray from toxic dust, aerosols, dangerous liquids, gas or toxic vapours.

Risks or use	Symbol*	Spectacles	Goggles / Helmets	Safety face shields	Standard
Liquid droplets	3				EN166
Liquid splashes	3				EN166
Large dust particles > 5 microns	4				EN166
Gas and fine dust particles < 5 microns	5				EN166

The 3, 4 and 5 symbol or symbols must imperatively be indicated on the frame. If none of these numbers is indicated in the markings, then the equipment is not suitable for chemical risks.

## PROTECTING FROM ELECTRIC RISKS

Protection from live contact and short-circuit electric arcs.

Risks or use	Symbol*	Spectacles	Goggles / Helmets	Safety face shields	Standard
Short-circuit electric arc	8				EN166

The 8 symbol must imperatively be indicated on the lens and the frame to guarantee protection from electrical risks.

## PROTECTING FROM RADIATION RISKS

Exposure of the eyes to high intensity, ultraviolet, infrared and visible light sources, welding activities, steelworks, surgery.

Risks or use	Symbol*	Spectacles	Goggles / Helmets	Safety face shields	Reference standard
Ultraviolet radiation	2				EN166 EN170
Infrared radiation	4				EN166 EN171
Solar radiation for industrial use	5 or 6				EN166 EN172
Electric welding	EN175 for the hood EN379 for the filter				EN166-169 EN379
Gas welding	1.7/3/5				EN166 EN169
Laser radiation	R1 to R5 LB1 to LB10				EN207 EN208

The standard is identified on the lens markings.

\*See the marking in position on page 15.

Clear, smoked and CSP lenses cover 95% of the needs of all activities.

**95%**  
OF THE SPECTACLES IN THE RANGE ARE MANUFACTURED FROM POLYCARBONATE

- **Ultra strong** (20 times stronger than conventional mineral glass),
- **Ultra light** (20 g on average for a single lens),
- **Ultra thin** (2.2 mm on average).

Bollé Safety also offers mineral, acetate, CR39 and TRIVEX lenses, mainly for the prescription protective range.

## CHOOSE THE RIGHT LENS FOR YOUR WORK ENVIRONMENT

### Glare protection:

Glare is a difficulty in seeing in the presence of strong light. Vision is altered by too intense light. When working outdoors, regardless of the conditions, it is important to provide glare protection.

### Contrast enhancement:

Contrast is the difference in light between light and dark. Strengthening it makes it possible to better assess the details of our sight in order to be more accurate in more restrictive environments (dark/night for example).

Use the quick search to find your models P. 130-131

 **FOR OUTDOOR USE**

**POLARIZED** 

**THE END OF GLARE!**

- Improves colour perception and visual comfort.
- Improves perception of contrast and depth.
- Reduces eye strain.

Available on the MERCURO, BAXTER, TRYON, CONTOUR and HUSTLER models.

**FLASH** 

- Protects from heat.
- Ideal for use outside in full sunshine.
- Can be combined with technology POLARIZED.

Available on the TRYON and HUSTLER models.

**TWILIGHT** 

**IDEAL FOR OUTDOOR USE IN LOW LIGHT CONDITIONS**

- Recommended for work outdoors at dawn and dusk.
- Improves contrast in low light.
- Effectively absorbs blue light (>75%).
- Is compatible with the PLATINUM anti-fog coating.

Available on the RUSH, RUSH + and IRI-s models.

**SMOKE OR LIGHT SMOKE** 

- Outdoor use only.
- Filters UVA and UVB (99.99%).
- Is compatible with the PLATINUM anti-fog coating.

 **FOR INDOOR/OUTDOOR USE**

**CSP**  **Comfort Sensitivity Perception**

**THE BEST INDOOR/OUTDOOR COMPROMISE**

- Ideal for all activities requiring exposure to alternating high and low light.
- Adapted to environments with extreme temperatures, both cold and hot.
- Blue light filtration and combination with the exclusive PLATINUM anti-fog coating.

Available on the following models: RUSH+, RUSH+ SMALL, COBRA, BAXTER, SILIUM+, MERCURO, NESS+, SILEX+, CONTOUR, SLAM+, PILOT and TRYON.

**ESP**  **Extra Sensory Perception**

**COMBATS GLARE DURING FREQUENT MOVEMENTS**

- 1 colour, 2 uses - indoor & outdoor.
- Provides good visible transmission (>60%).
- Reduces glare and reflection when moving from a dark area to a lit area.
- Filters blue light.

Available on the COBRA, CONTOUR, SLAM and CONTOUR MÉTAL models.

**YELLOW** 

- Recommended for low light environments, both indoors and outdoors.
- Increases contrast (ideal for night driving for example).
- Filters blue light.

Available on the SILEX, TRACKER, COBRA, BANDIDO and SLAM models.

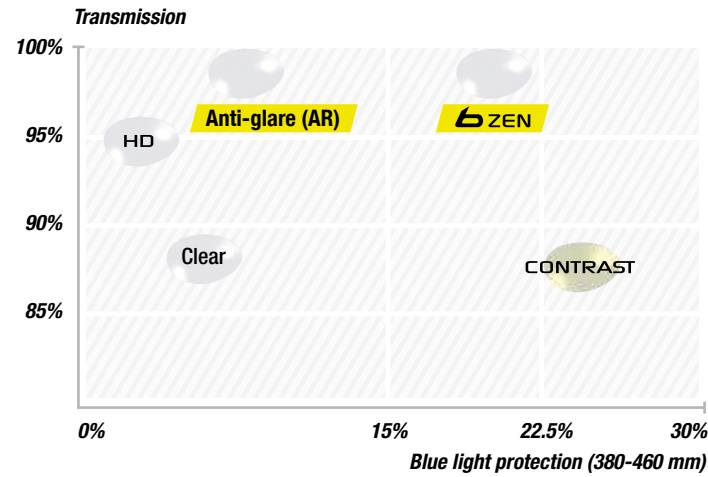

**FOR INDOOR USE**

**CHOOSE THE RIGHT LENS FOR INDOOR USE**

In an indoor working environment, it is important to define your accuracy requirements for your professional tasks and to assess your blue light exposure risks.

The higher the visible light transmission percentage (the light you see with the naked eye), the more the lens will transmit a high percentage of that light. **Therefore, the closer the transmission is to 100%, the closer we are to visible light without wearing spectacles, which favours vision accuracy.**

Computer screens and LED lighting emit blue-enriched light which can have physiological effects (such as sleeping disorders) and can damage the retina. **Therefore, it is important to choose** lenses that provide high protection from blue light for professionals subjected to intense artificial lighting and for those who spend many hours in front of a screen.

**ANTI-GLARE PRESCRIPTION**

**ANTI-GLARE, WATER REPELLENT, ANTI-STATIC AND REINFORCED ANTI-SCRATCH COATING**

- Lenses without anti-glare coating result in a reduction of light transmission of 10 to 15%, thereby penalising visual quality. Anti-glare coated lenses are perfectly transparent and transmit 99% of light.

**ANTI-GLARE B ZEN PRESCRIPTION**

**THE B-ZEN COATING WAS DESIGNED FOR PEOPLE EXPOSED TO BLUE LIGHT AND DIGITAL TOOLS**

This water-repellent, anti-glare, anti-static, anti-scratch coating filters about 20% of undesirable blue light and gives:

- Clearer and more accurate eyesight.
- Improved comfort and visual performances.
- Reduces the risk of ARMD and retinal lesions.
- It is very scratch resistant and easy to clean.

Coming soon **A SPECIAL OFFICE RANGE** available with afocal polycarbonate lenses **FOR EFFECTIVE PROTECTION FROM BLUE LIGHT!**

**HD**

High Definition

**A REVOLUTIONARY COATING FOR EXCEPTIONAL CLARITY**

- Improves perception and clarity thanks to its exceptional visible light transmission rate (96%).
- Increases the wearer acceptance rate thanks to greater visual comfort as compared to conventional clear lenses.
- Featuring hydrophobic technology (used by automotive suppliers), the HD coating guarantees perfect water resistance in very humid environments and improved visual acuity.

Available on the RUSH and COBRA models.

**CONTRAST**

**FOR BETTER INDOOR WORKING COMFORT**

- Combats the aggression of artificial lighting.
- Reduces eye fatigue providing optimum working comfort and improving contrast and relief.
- Ideal for activity at a static workstation lit using neons, halogens or other sources of blue light that can affect the eyes.

Available on the AXIS and COBRA models.

**CLEAR**

**INDOOR USE**

- Safety spectacles with clear lenses are essential indoors.
- Bollé Safety clear lenses provide 90% light transmission.
- Is compatible with the PLATINUM anti-fog coating.

**AN EXCLUSIVITY FROM BOLLÉ SAFETY**

**ANTI-SCRATCH AND ANTI-FOG COATING:**  
**PLATINUM**  
**THE OPTIMUM PROTECTION**

The European standard only tests the scratch resistance on the outside surface of the lens (K marking) and the fog resistance on the inside surface of the lens (N marking).

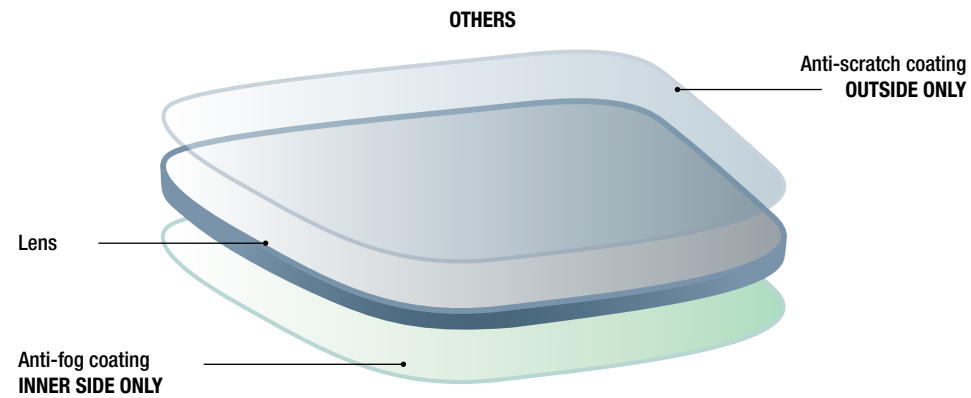

At Bollé Safety, we are convinced that scratches and fog do not only attack specific surfaces...

**This is why we have decided to permanently apply the anti-scratch AND anti-fog coating to each lens surface (inside AND outside).**

This dipping process offers protection which is twice as efficient and considerably slows the appearance of fog and scratches.

**Bollé Safety**

**DISCOVER A BROAD CHOICE OF PLATINUM® COATED PRODUCTS for superior protection from fog and scratches in all work environments**

MAKE THE RIGHT CHOICE

# INNOVATION FOR INCREASED PERFORMANCE

## REMOVABLE TEMPLES

This technology is used to quickly and easily convert safety spectacles into safety goggles (and vice versa).  
The temples can be switched with the foam + strap kit.

### ULTIM8 SPECTACLES

- Protection from low energy impacts 45m/s - "F"
- EN166 FT CE

### ULTIM8 GOGGLES

- Protection from medium energy impacts 120m/s - "B"
- Protection from liquid droplets "3", large dust particles "4" and gas and fine dust particles "5"
- EN166 3 4 5 BT CE

## COBRA SPECTACLES

Removable temples

## COBRA GOGGLES

Foam + strap kit

## FLEX 160°

The FLEX 160° technology allows for perfect adjustment regardless of face size.

The built-in spring hinge technology allows for very flexible temples to adapt to different head sizes, without compromising optical quality.

## PIVOTING TEMPLES / TILTING FRONT

This technology is used to adapt the angle of the spectacles to improve protection.

## PHOSPHORESCENT TEMPLES

Glow technology makes it possible to be seen in the dark thanks to its phosphorescent material.

5 minutes under an active light source activates the temple phosphorescence for several hours.

## FLEX

Flex technology provides unique flexibility.

Flexible and fully malleable, the FLEX bridge can be adjusted in all directions and fits all face shapes perfectly thanks to its shape-memory material.

## ADJUSTABLE BRIDGE

Designed to adapt to the nose so the frame sits perfectly on the face.

## NEW

### ASIAN FIT

Because every face is unique and because comfort and safety remain our top priority.

Bollé Safety has specially designed and developed frames for wider faces and higher cheekbones as well as a lower nasal bridge.

### SMALL FACES

Spectacles adapted to narrow faces.

OUR COLLECTIONS

# YOUR CUSTOMISED MODELS

**Customise the eyewear of your choice\* using your brand and take advantage of Bollé Safety expertise and quality!**

Bollé Safety was one of the first players to offer its customers a co-branding offer. Thanks to that experience and our commitment to push our limits to satisfy your needs, you benefit from an innovative service and faultless manufacturing quality for your ultimate satisfaction.

## EXCLUSIVITY BOLLÉ SAFETY

You can choose to have your brand markings on the lens, temple or the case (if the product is delivered with a case).

### Exclusive: online customisation module

- Bollé Safety innovates and offers a new exclusive digital service.
- Live a unique experience.
- Available 24\*7.

**CHECK OUT THE FULL OFFER IN THE CO-BRANDING BROCHURE.**

# 4 GOOD REASONS TO CHOOSE BOLLÉ SAFETY CO-BRANDING FOR YOUR EYE PROTECTION

### Complete customisation

We create a product in your image: lens markings, temple markings temple colours, **NO LIMITS on creation!**

### Your brand is visible

No matter the industry, your employees will convey the identity of **your brand and raise greater awareness** of your organisation.

### You have a unique eyewear

If you wish to place a new order: it's easy, just send us your specific reference and we will start production!

### Offer your employees spectacles they feel like wearing

Because the look is essential and because it's easier to adopt products in your image, your employees will be proud to wear their ultra-personalised spectacles!

**NEW**

Co-branding is also available for some goggle models

# **SPECTACLES**

*Bollé Safety is always innovating to bring you more performance. Our complete range of spectacles is designed to adapt to all working environments while providing style, comfort, lightness and modularity for optimum protection.*

Filter performance is measured by its optical class consisting of 4 numbers, for example 1/1/1/1 or 1/1/1/2 standing for, in order:

- The optical quality (minimum optical deformation in class 1)
- Light diffusion (maximum accuracy in class 1)
- Consistency (minimum image disturbance in class 1)
- Dependency angle (maximum field of vision in class 1)

## NEW

Our welding range is entirely researched and designed to meet current standards as well as comfort and style rules. All our welding helmets are fitted with active darkening filters (ADF) for all types of welding (Coated electrode arc, MIG/MAG, TIG, PLASMA) for effective protection from UVs and infrared.

The new TRUE COLOR technology on our active filters makes it possible to improve colour recognition while reducing eye fatigue and increasing visibility of the welding area.

(Available in summer 2020)

Depending on your activity, choose your spectacles or goggles welding shades on page 93.

# WHY CHOOSE BOLLÉ SAFETY TO PROTECT AND CORRECT YOUR EMPLOYEES' EYESIGHT?

- Bad eyesight generates the risk of accidents and decreased productivity. **Our wide range of solutions meet 98% of prescription needs.**
- The Excellence prescription programme is a simple, turnkey offer available to all to combine protection and correction for every employee.
- We support you** to recommend the best solutions and our secure ordering website allows for reliable and simple real-time management.
- We guarantee **optimum lens quality** and personal service with a **network of local partner opticians.**

**Well protected eyes and properly corrected eyesight lowers the risks of accidents and reduces financial costs. Thousand of businesses are already working with us, why not yours?**

*Our models are available in Polycarbonate, CR39 and TRIVEX.*

## THE PRESCRIPTION PROGRAMME

★ EXCELLENCE

The very essence of innovation to provide your employees more comfort and meet your obligations.

NEW FRAMES  
stylish, sporting and a special office line!

WEBSHOP

An online order website developed for you!

- + FAST
- + SIMPLE
- + RELIABLE

## SELECT YOUR FRAME BASE CORRECTLY

Depending on your protection requirements and your morphology we propose frames with curves varying from 4 to 8.

**4**  
SLIGHTLY CURVED  
Recommended for all corrections

**6**  
CURVED  
Adapted for 85% of corrections

**8**  
VERY CURVED  
Adapted for 70% of corrections

Check out our prescription brochure for more information

The frame selection may vary from one country to the other, please contact your salesperson for more information.

# CIVIL PROTECTION AND DEFENCE

As early as 1960, we developed eye protection adapted to the French Army, Navy and Aerospace. Today we propose a highly technical range for military uses or as part of civil protection, with and without correction, compliant with international standards EN 166 / ANSI Z87 / STANAG / MIL.

The flagship safety range products are available for the civil protection and defence sectors. Get **COBRA**, **CONTOUR**, **CONTOUR METAL**, **HUSTLER**, **NESS+**, **PILOT**, **RUSH+**, **SILIUM+**, **TRYON**, **ULTIM8** and **VOODOO**.

Added to those is a full spectacle and goggles range that are ballistic certified including:

For more information about the civil protection and defence range, visit [bolle-tactical.com](http://bolle-tactical.com) or contact us for specific developments.

**IT RESISTS**

### ANTI-SCRATCH AND ANTI-FOG PLATINUM® COATING EVER LASTING PROTECTION

- Applied by dipping the lenses and therefore covering both sides, the PLATINUM® coating is a permanent coating resistant to cleaning. It makes the lenses highly scratch-resistant and significantly slows the appearance of fogging, guaranteeing more safety, reliability and comfort.
- Imitated but never equalled, PLATINUM® meets every requirement of all international standards, in particular EN166 option K and N. PLATINUM® is available on many models.

**SILIUM+**  
Available in clear, smoke, CSP versions.
